OBJECTIVE

Backend Developer with hands-on experience in Python, Django, and Flask through personal projects. Skilled in building RESTful APIs, database design (PostgreSQL, MySQL, MongoDB), and Linux system administration. Quick learner seeking to contribute technical skills in a professional development environment.

TECHNICAL SKILLS

Operating Systems: Linux (Arch, Ubuntu, NixOS)
Programming & Scripting: Python, C++
Database Systems: PostgreSQL, MySQL, MongoDB, SQLite
Web Technologies: Django, Django REST Framework, Flask
Tools & Others: Git, GitHub, Docker, Swagger, JWT, OAuth, Postman

EXPERIENCE

Backend Developer Intern

2024 - 2024

Elixir Techne

Ahmedabad, Gujarat

- Developed and maintained RESTful APIs using Django and Django REST Framework
- Designed and optimized database schemas using PostgreSQL
- Built backend services for user management and data processing
- Collaborated with team using Git for version control and code management
- Wrote API documentation and performed testing using Postman

PROJECTS

Telecom Customer Churn Prediction | *Python, Django, DRF, Scikit-learn, XGBoost, Pandas, NumPy, SQLite* 2025

- Built an end-to-end customer churn prediction platform using Django, enabling businesses to identify at-risk customers through an interactive analytics dashboard
- Engineered a machine learning pipeline using Pandas, Scikit-learn, and SMOTE to handle imbalanced datasets and train an accurate XGBoost classification model
- Developed a REST API to expose predictive models, supporting both single-customer evaluations and bulk CSV batch predictions in real-time; serialized trained models using Joblib/Pickle
- Designed the database schema using Django ORM and SQLite to manage prediction logs, user sessions, and historical churn data
- Visualized model performance by dynamically generating and serving confusion matrices and ROC curves to the frontend dashboard

Banking Management System | *Django, DRF, SQLite*

2025

- Designed and developed a full-stack Banking Management System supporting account creation, customer details management, balance tracking, and transaction processing
- Built RESTful APIs using Django REST Framework for deposits, withdrawals, and transaction recording
- Implemented digital passbook functionality using JSON fields to maintain complete transaction history
- Designed relational database models for Accounts and Transactions with SQLite integration
- Enabled bulk data handling via CSV/Excel import and integrated Django Admin Panel for backend management

Django Backend Exploration & API Development | *Django, DRF, PostgreSQL, JWT, Swagger*

2025

- Integrated PostgreSQL with Django for production-ready database management and optimized query handling
- Implemented secure authentication using JWT and token-based systems; configured email as the primary username for login
- Customized Django Admin Panel for enhanced data control and explored Django middleware for request/response lifecycle management
- Documented REST APIs using Swagger/OpenAPI and explored OAuth authentication flow concepts

EDUCATION

Bachelor of Technology in Computer Science/IT

Expected Graduation: May 2026

Ganpat University

Ahmedabad, Gujarat

Higher Secondary Education (Diploma)

2023

Sal Institute Of Diploma Studies

Ahmedabad, Gujarat
